

The background of the cover features a photograph of a coffee plantation. In the foreground, there are green coffee leaves and clusters of bright red coffee cherries. The background shows a hilly landscape with more coffee trees under a bright, slightly hazy sky. A large, white, curved shape, resembling a stylized 'C' or a protective shield, is superimposed over the right side of the image, creating a clean space for the text.

SECTION Two: Products & services

3.1 Sourcing framework

- Coffee production Zones and systems the coffee is grown from the upper zone of Kirinyaga among other coffee producing counties around Mt. Kenya, and it is communally processed and thus sourced from many small-scale farmers scattered around coffee growing zones.
- General profile of the coffee from the Kirinyaga region of Kenya flourishes in rich, volcanic soil and after selective hand picking, is wet processed in fresh water to obtain the best Grades of AA and AB. The coffee has full of sweet complex Flavors, lively acidity, and rich velvet body, specialty lots of Kirinyaga coffees carry a distinct terroir that some call classic Kenyan flavor

3.2 Quality development framework

- Treadville, takes cognizance that Growing, roasting, and brewing coffee is a beautiful art. At Treadville, the process involves much more than just the beverage. To enhance our customer experience, we employ,

3.2.1 Production & milling support for farmers

Treadville takes cognizance that production is integral part of quality management and development. As such, we take pride in supporting farmers through agronomic advisory on coffee production at the farm level. This service is extended to both large, medium and small-scale farmers. Further, we render expertise to farmers owning wet mills to ensure, from pulping, grading, to fermentation to drying and storage. Treadville, takes cognizance that these processes have direct impact on the cup quality, including the aromas, the taste and so on. We support framers to ensure the wet milling processes contribute to the overall cup quality and ultimately the customer experience.

3.2.2 drying milling & grading participation

Dry milling is integral in maintaining and preserving the salient quality components of coffee, especially the visual characteristics. Treadville provide technical support to millers milling coffee earmarked form our markets. We oversee operations, grading, bagging, and other quality assurance operations like quality assessment, grading, sorting and storage of the coffee beans.

3.2.3 Liquoring and quality assessment

We have a team of highly qualified liquoring staff with some having been licensed as Q-graders. Coffee directorate runs a robust capacity and training programs for personnel in coffee quality assurance. The directorate has long standing association with various specialty coffee association across the globe including; Specialty Coffee Association, coffee quality institute (CQI) an institution that trains the highest quality assessment personnel commonly known as Q-grader, among others. We therefore assure our clientele, that our coffee undergoes rigorous assessment by the best, based on established and thoroughly peer reviewed methods in our state-of-the-art Lab.

3.2.4 Handling & packing supervision

Handling and packaging is a critical component of ensuring quality and safety of coffee. Alongside with securing the feeling of the customer experience, our processes ensure all products are safely handled and packaged using top quality foodgrade packaging materials mostly drawn from natural fibers, the jute or sisal. We subject our processes to all inspection and certification authorities including phytosanitary assessment through KEPHIS, quality and compliance certification through SGS and compliance with USDA code of standards through

use of certified and registered warehousing systems. All this, Treadville, endeavors to enhance customer experience and safety by ensuring compliance with regulatory frameworks for food safety.

3.3 Coffee Bean Export & Import

Treadville, is an ardent actor within the global coffee value chains. Participating from production, processing, handling and ultimately market development at various levels including, Bulk export of beans, specialty coffee dealership, private label packaging, own brand development (Treadville),

3.4 Coffee marketing services

3.4.1 Washed coffee

We focus on bulk export of washed coffee, premium AA and ABs of the top-quality Arabica coffees, coffee grown along the rolling hills and valleys of Mt. Kenya and aberdare forests. The coffee is handpicked and processed using water and mechanical systems, the grading uses gravity to ensure only top-quality beans are mainstreamed for dry milling and grading using top quality systems including automated systems like color sorting, for top grades, sorting is done using human touch to ensure energy is preserved from cultivation, processing and grading and ultimately grading through human expertise in liquoring to classify the bean in FAQ framework. In extreme cases Q-grading system is employed to ensure a life experience for Royal Coffee Consumers, around the world.

3.5 Specialty Coffees

3.5.1 FAQ++ AA & AB

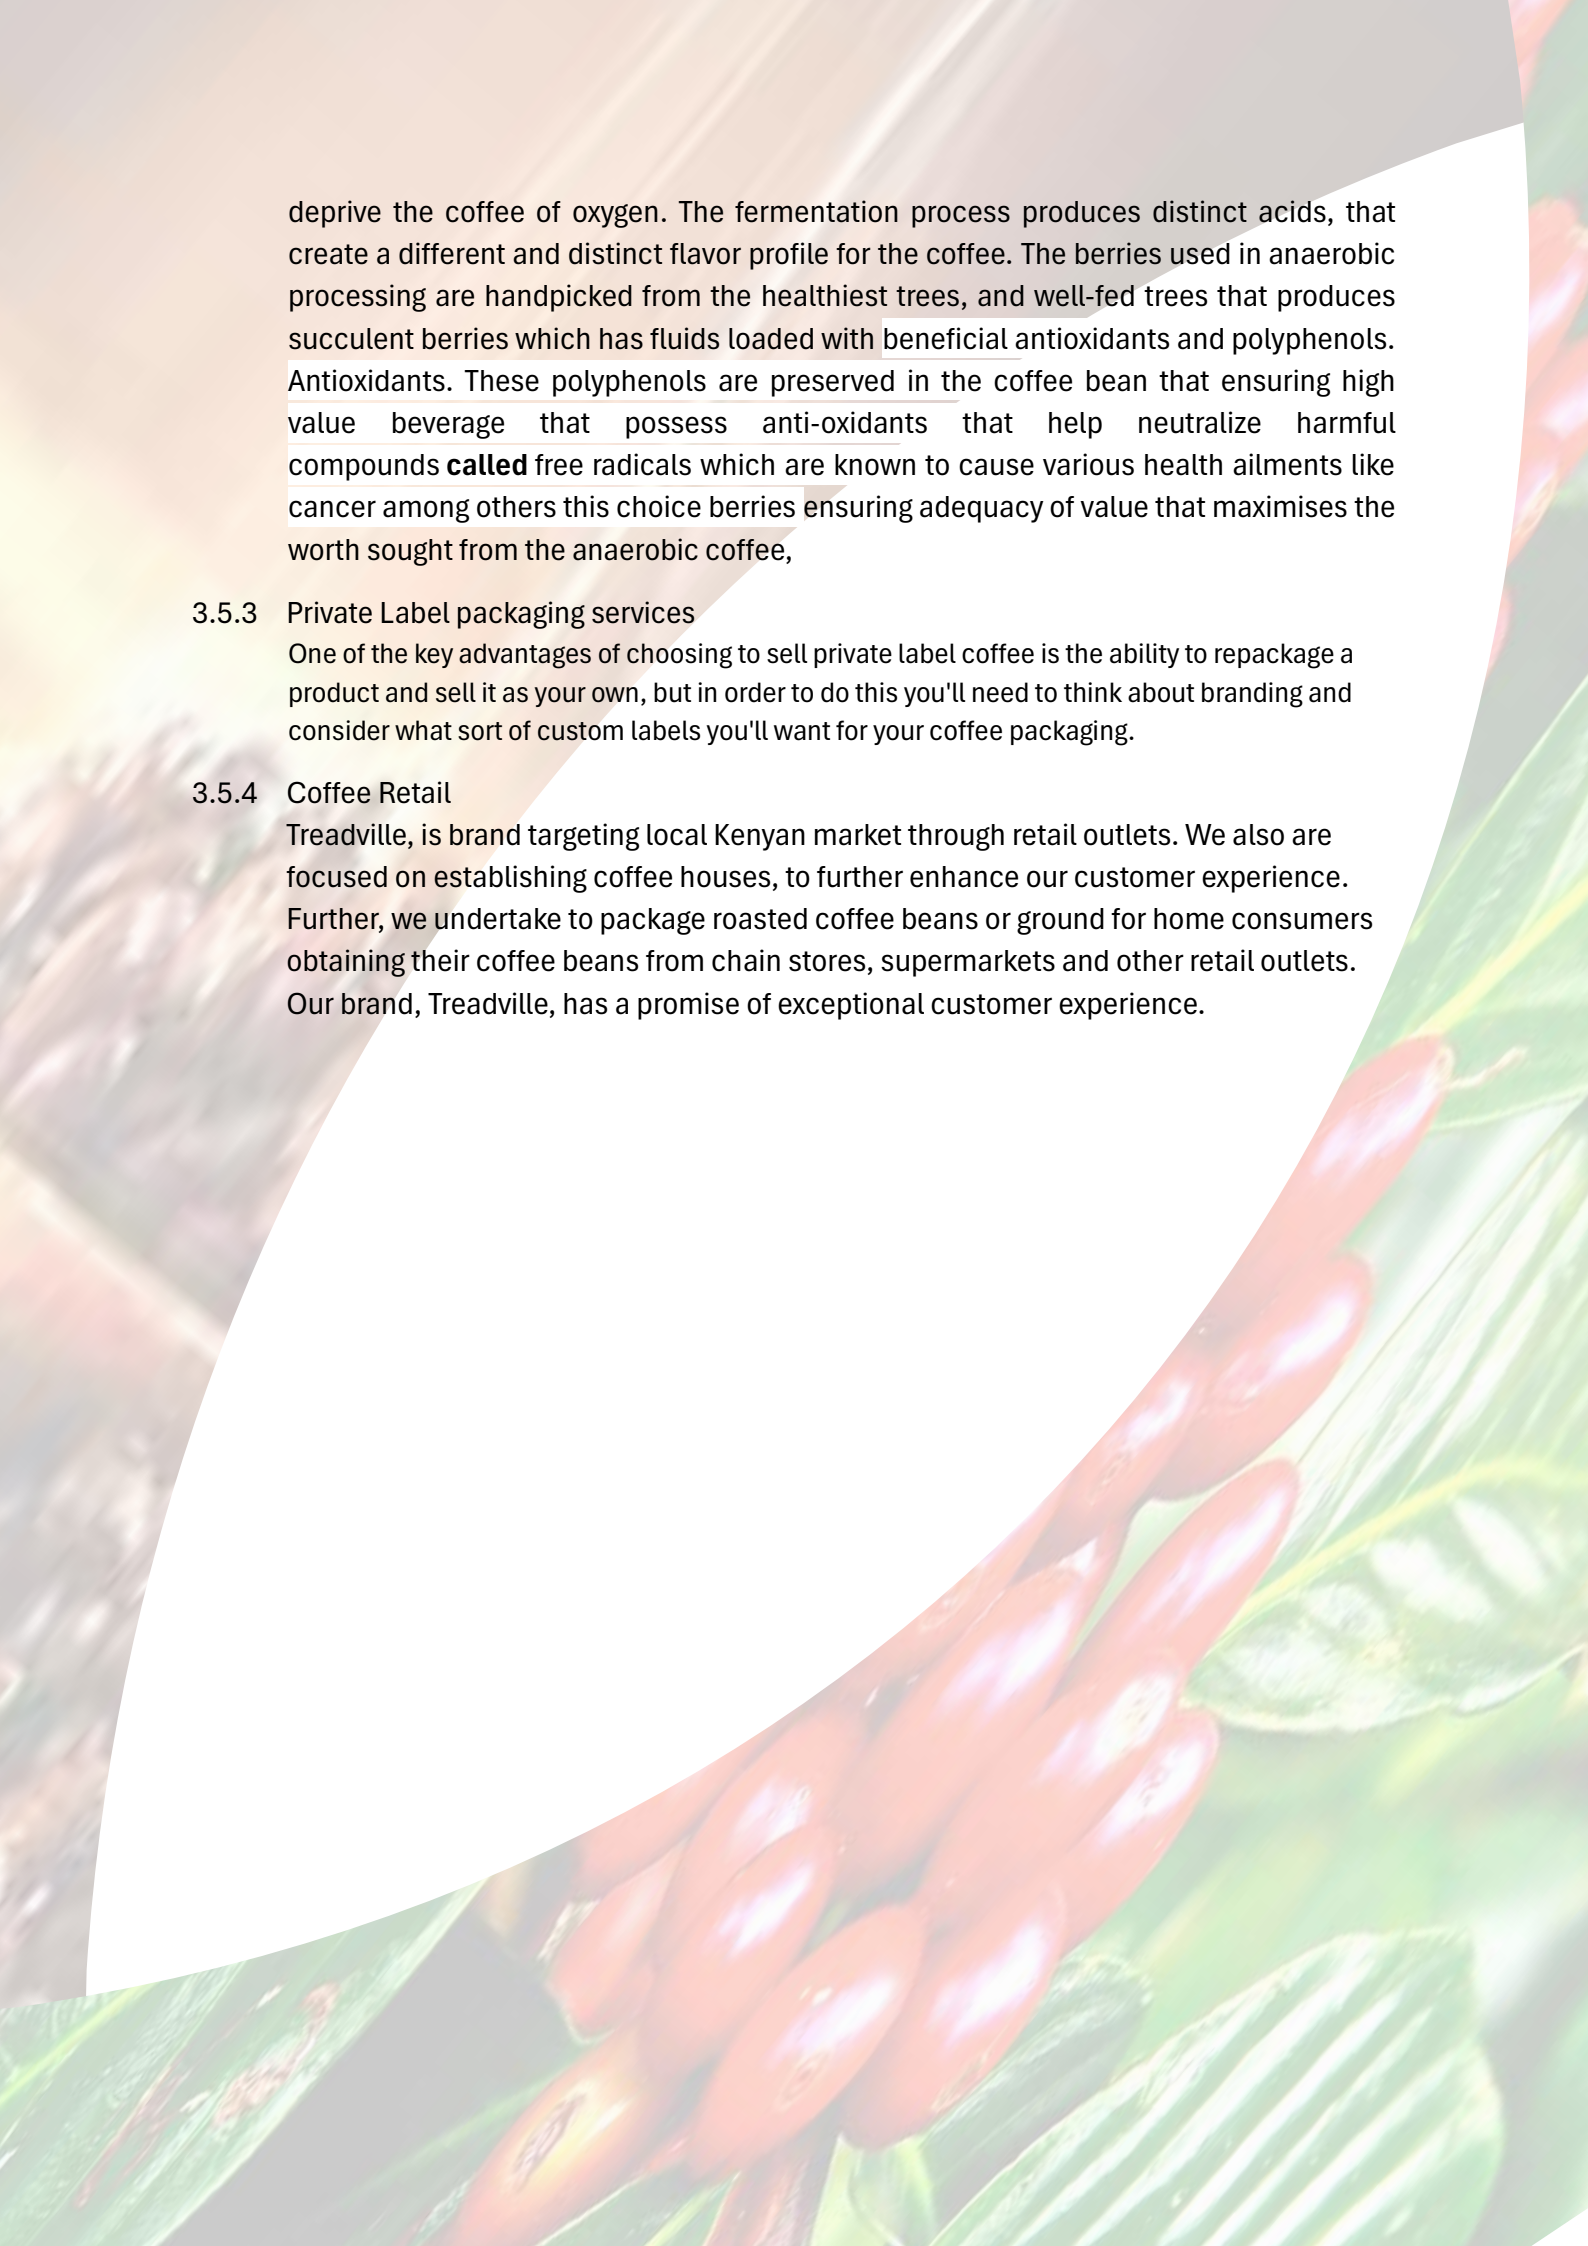

Treadville, presents various genres of Specialty coffee is the highest grade of green bean coffee available. The process of developing specialty coffee involves the entire supply chain and features single-estate or single-origin coffees. Erna Knutsen first coined the term in 1974. It has been embraced by coffee lovers around the world for its taste and quality. Today, several million bags of specialty coffees are sold annually.

Our speciality coffee are strictly drawn from Arabica, we strictly put our coffees as speciality from 1,600 to 1,850 meters above sea level along the rolling hills of mt. Kenya, with key rivers including (rwamuthambi, rundu, rutui, mukengeria, kiringa, nyamnidi and thiba rivers that are directly drawn from lake Ellis and **Lake Michaelson**, which are fed by glaciers that are as old as 6000 years, giving the coffees special qualities including tangy acidity and touch of savory with brings its unique and rich complexity.

At Treadville, we endeavor to ensure what we present as speciality coffees, The widely accepted definition of specialty coffee is coffee scoring 80 points or above on the 100-point scale used on the Specialty Coffee Association Cupping form. Coffee scoring from 90–100 is graded Outstanding, coffee that scores 85–89.99 is graded Excellent, while coffee scoring 80–84.99 is graded Very Good.

3.5.2 Anaerobic Coffee

At Treadville, we take cognisance that the present-day enthusiast is looking for experience while being satisfied, the emerging genre of anaerobic. We take pride in preparation of our Anaerobic coffee which are fermented in pressurized sealed tanks to

deprive the coffee of oxygen. The fermentation process produces distinct acids, that create a different and distinct flavor profile for the coffee. The berries used in anaerobic processing are handpicked from the healthiest trees, and well-fed trees that produces succulent berries which has fluids loaded with beneficial antioxidants and polyphenols. Antioxidants. These polyphenols are preserved in the coffee bean that ensuring high value beverage that possess anti-oxidants that help neutralize harmful compounds **called** free radicals which are known to cause various health ailments like cancer among others this choice berries ensuring adequacy of value that maximises the worth sought from the anaerobic coffee,

3.5.3 Private Label packaging services

One of the key advantages of choosing to sell private label coffee is the ability to repackage a product and sell it as your own, but in order to do this you'll need to think about branding and consider what sort of custom labels you'll want for your coffee packaging.

3.5.4 Coffee Retail

Treadville, is brand targeting local Kenyan market through retail outlets. We also are focused on establishing coffee houses, to further enhance our customer experience. Further, we undertake to package roasted coffee beans or ground for home consumers obtaining their coffee beans from chain stores, supermarkets and other retail outlets. Our brand, Treadville, has a promise of exceptional customer experience.

SECTION THREE: BUSINESS GROWTH MODEL

4.1 Introduction

Treadville through its Coffee Brand, is cognizant of the dynamic business environment locally, continentally and globally has a very robust business growth model.

4.2 Our value propositions

Treadville subscribes to the adage that our stakeholders (investors, shareholders, customers and our staff) are kings, we endeavor to develop an approach with full mix of benefits or economic value which it promises to deliver to the current and future customers who will buy their products and/or services. We deploy the balanced score card concept, which is a strategy performance management tool which provides for a well-structured report used to keep track of the execution of activities by staff and to monitor the consequences arising from these actions. Our value proposition focuses on;

- Learning and growth for employees, leaders, managers, experts
- Business processes ensuring suppliers, contractors and so on are well integrated into our business processes to ensure seamless engagement
